

HYDROCLEAN M 103

MIRIFIC HYDROCLEAN M 103 is a blend of inorganic acids and special surface active agents, coupled with a unique acid inhibitor. This combination makes MIRIFIC HYDROCLEAN M 103 an extremely effective cleaner for the removal of cement, mortar stains, lime scale deposits, efflorescence and for the derusting of steel surfaces.

FEATURES

BENEFITS

Powerful

MIRIFIC HYDROCLEAN M 103 quickly removes even heavy deposits of rust and scale.

Versatile

Widely used in the construction industry, MIRIFIC HYDROCLEAN M 103 descales and derusts and can also be used for removing concrete deposits, lime scale and efflorescence and for etching new concrete prior to sealing.

Fully inhibited

The inhibitor system in MIRIFIC HYDROCLEAN M 103 protects the base metal from acid attack, without affecting its cleaning power.

Biodegradable

MIRIFIC HYDROCLEAN M 103 is fully biodegradable in both hard and soft water areas.

Economical

MIRIFIC HYDROCLEAN M 103 can be diluted with up to 5 parts water, depending on the degree of soiling.

Directions for use

Cement and Mortar Removal – Brush or scrape off heavy deposits before applying MIRIFIC HYDROCLEAN M 103 by brush or mop. Allow a few minutes contact time before brushing or scrubbing the surface and then rinse off with clean water.

Brick Efflorescence – Dilute MIRIFIC HYDROCLEAN M 103 with 2-3 parts of water in a plastic or rubber bucket. Apply by brush or mop and then rinse off well with clean water, (Efflorescence stains may return if the cause is not treated.)

Lime and Scale Deposits – MIRIFIC HYDROCLEAN M 103 can be diluted with up to 5 parts of water, depending upon the degree of scaling, Spray, brush or mop the MIRIFIC HYDROCLEAN M 103 solution onto the surface to be cleaned. Alternatively, the MIRIFIC HYDROCLEAN M 103 solution can be circulated over the soiled surface until the scale has been removed. After removal of scale, thoroughly rinse or hose the surface with water.

Pack Size

Available in 25 litre cartons.
