

Pool Care M 126

MIRIFIC POOL CARE M 126 is a cationic surfactant mixture .It can be used in pools, spas, hot baths, fountains, cooling systems, industrial fresh water and cutting fluids. It is effective against both the greenish free-floating varieties of algae and the so called "Black Algae" that cling to the walls and bottoms of pools, etc. the regular use of POOL CARE can overcome the problems caused by algae such as unsightly appearance, murky water, objectionable odors, clogged filters and increased chlorine demand. POOL CARE is effective at all pH values. POOL CARE will not interfere with the efficient operation of sand, diatomaceous earth or other commonly used types of filters.

FEATURES

- ❖ **POOL CARE** is effective against a broad spectrum of micro-organisms at low dosage levels.
- ❖ **POOL CARE** is safe, it has an extremely low toxicity to warm blooded animals.
- ❖ **POOL CARE** is completely water soluble.
- ❖ **POOL CARE** is compatible with most other pool treatment chemicals.
- ❖ **POOL CARE** function as a microbiocide.

Directions for use

Normal treatment

For treatment of a fully cleaned and filled pool, add initially 11-22 ml of POOL CARE per cubic meter of water. To maintain pools etc., free of visible algae growth, they should be treated with 5.5-11 ml of POOL CARE per cubic meter of water typically dosed twice per week after the initial treatment. Uniform distribution of POOL CARE throughout the water is necessary for maximum effectiveness of the product. POOL CARE is compatible with most pool chemicals and can reduce the amount of chlorine normally required. However, do not mix POOL CARE with concentrated dry or liquid chlorine products.

Heavy treatment

For maximum effectiveness, pools containing a heavy growth of algae should be cleaned prior to starting with POOL CARE. Pools having just visible algae growth (greenish cast to the water or black or green spots on the walls and bottoms) should be treated with 35-50 ml of POOL CARE per cubic meter of water. Then about 24 hours later, the algae/debris should be removed by standard cleaning procedures, including brushing loose algae spots. Vacuuming the pool and back washing the filter.

Pack Size

Available in 4 x 5 litre cartons.
